

Keeping our promises. Real progress for the environment.

Budget 2018 puts Manitoba's economy on the road to recovery and provides a solid plan for making Manitoba the most improved province in Canada.

We're investing in priorities that support the environment across Manitoba including:

- investing more than \$140 million in the environment, including \$102 million for the Conservation Trust, the largest-ever fund for natural infrastructure that is protected from future governments;
- ensuring the revenue from the made-in-Manitoba carbon levy of \$25 per tonne of emissions will be returned to Manitobans through tax cuts over the next four years;
- investing \$40 million for green projects, such as green infrastructure to adapt to climate change, green technology to reduce greenhouse-gas emissions, and transition to a low-carbon economy and support for green best practices and training in emissions-intensive sectors such as agriculture;
- providing \$6.4 million to improve provincial parks across Manitoba including:
 - \$3 million toward upgrades to the waste-water treatment lagoon servicing the campground and east side of Grand Beach Provincial Park, upgrades to the water treatment system at Grand Beach West and new washroom and shower buildings;
 - \$1.6 million to design and construct a new waste-water lagoon to service all truck haul septic in the South Whiteshell area;
 - new washroom and shower buildings and upgrades to water treatment systems at Big Whiteshell Provincial Park;
 - new washroom and shower buildings at Paint Lake Provincial Park; and
- investing \$1.2 million to upgrade the Whiteshell Fish Hatchery.
