

EXCEPTION DRUG STATUS (EDS)

Certain drugs or other items are approved for coverage under the Exception Drug Status (EDS) Program when they meet specific criteria and upon review and recommendation of the Manitoba Drug Standards and Therapeutics Committee (MDSTC). The drugs or other items usually fall into one of the following categories:

- The drug or other item is ordinarily administered only to an in-patient of a hospital but is being administered outside of a hospital because of exceptional circumstances.
- The drug or other item is not ordinarily prescribed or administered in Manitoba, but is being prescribed because it is required in the treatment of a patient who has an illness, disability, or condition rarely found in Manitoba.
- Evidence, including therapeutic and economic evidence, provided to the minister in accordance with the criteria established by the minister, supports a specific treatment regime that includes use of the drug or other item.

Over-the-counter (OTC) products are generally not included as benefits of the Drug Plan. Exception Drug Status is not granted for appetite suppressants, drugs for the treatment of erectile dysfunction and vaccines normally provided by Public Health.

When an EDS drug is approved as a benefit, the cost will be covered through the Pharmacare Program during the time period authorized by the EDS Program and after the client's Pharmacare deductible has been met.

Effective October 18, 2021, "Part 3 Exception Drug Status" or "Part 3 benefits" will be referred to as "Exception Drug Status" or "EDS benefits".

CHANGES TO APPROVAL PROCESS AND EXPIRY DATES - EFFECTIVE OCTOBER 2017

Effective October 1, 2017 many drugs will no longer require EDS renewal for coverage under Manitoba's Provincial Drug Programs (PDP) and the Employment and Income Assistance Drug Program (EIA). All EDS drugs will still require initial approval, but for many drugs, if coverage approval is granted, this approval will be indefinite and prescribers will no longer need to reapply for extending or renewing this coverage. Any patient that has an active EDS approval (as of October 1, 2017) for any of the drugs affected by this change will automatically have the approval extended indefinitely. This change will affect only products identified on the List of Designated Drugs and may be updated from time to time. Details can be found online at:

<https://www.gov.mb.ca/health/pharmacare/healthprofessionals.html>

INFORMATION REQUIRED WHEN MAKING A REQUEST FOR COVERAGE:

- Prescriber Information - Name (including first initial), Address, Phone Number and Prescriber Number.
- Client Information - Client Name, Address, Manitoba Health Registration Number (MHRN), Personal Health Identification Number (PHIN) and Date of Birth.
- Drug Information - Drug Name (trade and/or generic name), Dosage Form, Strength, Expected Dosing and Expected Therapy Duration.
- Justification - Diagnosis and/or Indications for Use.

EDS request forms are now available online, please visit:

<http://www.gov.mb.ca/health/pharmacare/healthprofessionals.html#b>

NOTES REGARDING THE EXCEPTION DRUG STATUS (EDS) PROGRAM:

- Duly licensed practitioners prescribing within their scope of practice may apply for EDS.
- Requests can be submitted by mail or by fax.

The fax number is (204) 942-2030 or 1-877-208-3588. These numbers are for health professionals only.

- To ensure eligible benefit coverage, approval must take place prior to purchase or dispensing of a prescription drug. Retroactive coverage is not provided, no exceptions.
- EDS requests are prioritized by date received and the urgency of the request.
- To ensure continuity of coverage, requests for renewal should be forwarded prior to the expiry date.

Please allow at least one to two business days.

Urgent requests received during regular business hours will usually be processed within 24 hours.

- Patients are notified by letter if a request for coverage has been approved or denied.
- If a drug is approved for coverage under EDS, coverage is valid from the date of application to date of expiration.
- If denied, payment for the medication is the responsibility of the patient.
- For NEW requests - If a client meets EDS criteria for one of the products identified in the List of Designated Drugs with Indefinite EDS Approval, benefit coverage will be granted indefinitely. The client will receive an initial approval letter which confirms indefinite EDS approval.
- For RENEWAL requests - If a client has an active EDS approval for a product identified in the List of Designated Drugs with Indefinite EDS Approval – as of October 1, 2017, this coverage will be grandfathered indefinitely; no renewal will be required. The client will not be sent a letter to confirm their continued EDS approval.
- If the request for benefit coverage is not approved, payment for the medication is the responsibility of the patient.

NOTE: Not all medications currently available on the market in Canada are benefits under the Manitoba Drug Benefits Formulary or under the EDS Program.

NOTE: Some private and extended health insurance providers require their clients to have the EDS approval before they agree to cover any part of the prescription cost. It is the clients' responsibility to contact their private drug plan directly for further information.

PRODUCT SELECTION:

In September 2001, F/P/T Health Ministers agreed to establish a single Common Drug Review (CDR) for new drugs (chemical entities) submitted in Canada for coverage by F/P/T drug plans. Beginning September 2003, all new drugs are reviewed nationally through the CDR process, with expert advice and recommendations being provided by the Canadian Agency for Drugs and Technologies in Health (CADTH). The recommendations of CADTH are taken into consideration by each jurisdiction when making a listing decision.

CADTH recommendations are taken into account by the Manitoba Drug Standards and Therapeutics Committee who makes recommendations to the Minister of Health on drug products to be considered for benefit under the Pharmacare Drug Benefit Program.

Committee members provide recommendations on drug interchangeability and on the therapeutic and economic value of drug benefits.

For more information on the Manitoba Drug Formulary Review Process, please visit:

<http://www.gov.mb.ca/health/mdbif/review.html>

For more information on the Manitoba Drug Benefits Formulary and the Manitoba Drug Interchangeability Form

<http://www.gov.mb.ca/health/mdbif/>

PROVINCIAL DRUG PROGRAMS REVIEW PROCESS (SPECIAL CIRCUMSTANCES):

Should a prescriber wish to obtain EDS status for a drug not normally eligible for EDS status, the prescriber may apply in writing and include the information listed below.

Please address request to:

Provincial Drug Programs Review Committee
 300 Carlton Street – Room 1070
 Winnipeg MB R3B 3M9
 Fax (204) 942-2030 or 1-877-208-3588

Please include all of the information required for an EDS request (see page 1) as well as:

- Information and background on the original EDS request.
- Previous therapies tried and response to those therapies.
- Additional Information such as supporting literature to support the review.

CRITERIA:

Following are the criteria for coverage of **common** drugs requested under Exception Drug Status. Further information can be provided by professional staff at the Exception Drug Status program.

ANTIHYPERTENSIVE/ANTILIPIDEMIC DRUGS

02273233 02273284 02273241 02273292 02273268 02273306 02273276 02273314	Caduet	amlodipine/atorvastatin	5/10 mg 10/10 mg 5/20 mg 10/20 mg 5/40 mg 10/40 mg 5/80 mg 10/80 mg	Tablet
02411253 02411261 02411288 02411296 02411318 02411326 02411334 02411342	Apo-Amlodipine/ Atorvastatin	amlodipine/atorvastatin	5/10 mg 5/20 mg 5/40 mg 5/80 mg 10/10 mg 10/20 mg 10/40 mg 10/80 mg	Tablet
02362759 02362767 02362775 02362783 02362791 02362805 02362813 02362821	GD-Amlodipine/ Atorvastatin	amlodipine/atorvastatin	5/10 mg 5/20 mg 5/40 mg 5/80 mg 10/10 mg 10/20 mg 10/40 mg 10/80 mg	Tablet

For patients who have been titrated to a stable combination, for a minimum of at least 3 months, of the separate components, amlodipine besylate and atorvastatin.

02495244	Vascepa	icosapent ethyl	1 G	Capsule
----------	----------------	-----------------	-----	---------

To reduce the risk of cardiovascular events in statin-treated patients with elevated triglycerides, who meet all of the following criteria:

- Aged 45 years or older; AND
- Established cardiovascular disease (CVD) ¹ (secondary prevention); AND
- Baseline fasting triglyceride level greater than or equal to 1.7 mmol/L and lower than 5.6 mmol/L, measured within the preceding 3 months before starting treatment with icosapent ethyl, AND
- Receiving a maximally tolerated statin dose for a minimum of 4 weeks, targeted to achieve an LDL-C lower than 2.0 mmol/L.

¹ Established CVD is defined as: history of coronary artery disease (eg. Myocardial infarction, angina, coronary procedure, abdominal aortic aneurysm), cerebrovascular disease (eg. stroke, transient ischemic attack, carotid obstruction), or peripheral artery disease.

Note: Approval will be for a maximum of 4g daily.

AUTONOMIC DRUGS

02242115 02242116 02242117 02242118	Exelon	rivastigmine	1.5 mg 3 mg 4.5 mg 6 mg	Capsule
02245240	Exelon	rivastigmine	2 mg/mL	Oral Liquid
02336715 02336723 02336731 02336758	Apo-Rivastigmine	rivastigmine	1.5 mg 3 mg 4.5 mg 6 mg	Capsule
02485362 02485370 02485389 02485397	Jamp-Rivastigmine	rivastigmine	1.5 mg 3 mg 4.5 mg 6 mg	Capsule
02401614 02401622 02401630 02401649	Med-Rivastigmine	rivastigmine	1.5 mg 3 mg 4.5 mg 6 mg	Capsule
02324563 02324571 02324598 02324601	Sandoz Rivastigmine	rivastigmine	1.5 mg 3 mg 4.5 mg 6 mg	Capsule

Confirmed diagnosis of Alzheimer's Disease with DSMIV criteria with:

(a) Memory impairment (impaired ability to learn new information or to recall previously learned information); plus

(b) at least one of the following:

- Aphasia; problems with language (receptive and expressive)
- Apraxia; impaired ability to carry out motor activities despite intact motor function
- Agnosia; failure of recognition - especially people
- Disturbance in executive functioning

The above deficits must have:

- Caused significant decline in previous levels; and
- A gradual onset and continued cognitive decline; and
- The absence of other causative conditions; and
- The deficits do not occur exclusively during the course of delirium; and
- Normal test results for all of the following values: CBC, TSH, Electrolytes, Vitamin B12, and Glucose; and
- The initial MMSE score must be between 10 and 26 and measured within 30 days of the application.

02518058	Breztri Aerosphere	budesonide/glycopyrronium/ fomoterol	160/7.2/5.0 mcg	Metered Dose Inhaler
----------	---------------------------	---	-----------------	-------------------------

For the long-term maintenance treatment of chronic obstructive pulmonary disease (COPD), including chronic bronchitis and/or emphysema according to the following:

- Patients should not be started on triple inhaled therapy as initial therapy for COPD
- For use in patients who are not controlled on optimal dual-inhaled therapy for COPD

02501244	Enerzair Breezhaler	glycopyrronium/indacaterol/ mometasone furoate	50/150/160 mcg	Capsule
----------	----------------------------	---	----------------	---------

For the treatment of asthma in adult patients inadequately controlled with a maintenance combination of a long-acting beta-2 agonist (LABA) and a medium or high dose of an inhaled corticosteroid (ICS), who have experienced one or more asthma exacerbations in the previous 12 months.

02474522	Trelegy Ellipta	fluticasone furoate/ umeclidinium/vilanterol	100 mcg/ 62.5 mcg/25 mg	Powder for Inhalation
----------	------------------------	---	----------------------------	--------------------------

For the long-term, once daily, maintenance treatment of COPD, including chronic bronchitis and/or emphysema according to the following:

- Patients should not be started on triple inhaled therapy as initial therapy for COPD
- For use in patients who are not controlled on optimal dual inhaled therapy for COPD

BLOOD FORMING AND COAGULATION

Please contact the EDS Program at Manitoba Health for specific criteria.

Elonox, Elonox HP, Inclunox, Inclunox HP, Noromby, Noromby HP, Redesca or Redesca HP will be the preferred enoxaparin option for all enoxaparin-naïve patients prescribed enoxaparin. Preferred means the first enoxaparin product to be considered for reimbursement for enoxaparin-naïve patients. Patients will not be permitted to switch from Elonox, Elonox HP, Inclunox, Inclunox HP, Lovenox, Noromby, Noromby HP, Redesca or Redesca HP to another enoxaparin product or vice versa, if previously trialed and deemed unresponsive to therapy.

02458640 02458659 02458667	Lixiana	edoxaban	15 mg 30 mg 60 mg	Tablet
02312441 02358808	Pradaxa	dabigatran	110 mg 150 mg	Capsule
02468905 02468913	Apo-Dabigatran	dabigatran	110 mg 150 mg	Capsule

For patients with non-valvular atrial fibrillation (AF) for the prevention of stroke and systemic embolism AND in whom:

- (a) Anticoagulation is inadequate following a reasonable trial on warfarin; **OR**
- (b) Anticoagulation with warfarin is contraindicated or not possible due to inability to regularly monitor via International Normalized Ratio (INR) testing (i.e. no access to INR testing services at a laboratory, clinic, pharmacy, and at home).

02458640 02458659 02458667	Lixiana	edoxaban	15 mg 30 mg 60 mg	Tablet
----------------------------------	----------------	----------	-------------------------	--------

For the treatment of venous thromboembolic events (VTE) (deep vein thrombosis [DVT] and pulmonary embolism [PE]), and the prevention of recurrent DVT and PE for a duration of up to six months.

IRON PREPARATIONS

02477777	Monoferric	iron	100 mg/mL	Injection
----------	-------------------	------	-----------	-----------

For the treatment of iron deficiency anemia (IDA) in patients who meet the following criteria:

- Patient has a documented diagnosis of IDA based on laboratory test results (i.e. hemoglobin, ferritin); AND
- Patient has failed to respond or is intolerant to an adequate trial (at least 4 weeks) of oral iron therapy; OR
- Patient has a contraindication to oral iron therapy.
- Monoferric is administered in a setting where appropriate monitoring and management of hypersensitivity reactions can be provided to the patient.

02243716	Venofer	iron sucrose	20 mg/mL	Injectable Solution
02502917	pms-Iron Sucrose	iron sucrose	20 mg/mL	Injectable Solution

For the treatment of iron deficiency anemia (IDA) in patients who meet the following criteria:

- Patient has a documented diagnosis of IDA based on laboratory test results (i.e. hemoglobin, ferritin); AND
- Patient has failed to respond or is intolerant to an adequate trial (at least 4 weeks) of oral iron therapy; OR
- Patient has a contraindication to oral iron therapy.
- Iron sucrose is administered in a setting where appropriate monitoring and management of hypersensitivity reactions can be provided to the patient.

CENTRAL NERVOUS SYSTEM AGENTS

Anorexigenic Agents and Respiratory and Cerebral Stimulants

02239665	Alertec	modafinil	100 mg	Tablet
02285398	Apo-Modafinil	modafinil	100 mg	Tablet
02430487	Auro-Modafinil	modafinil	100 mg	Tablet
02503727	Jamp Modafinil	modafinil	100 mg	Tablet
02432560	Mar-Modafinil	modafinil	100 mg	Tablet
02530244	Modafinil	modafinil	100 mg	Tablet
02420260	Teva-Modafinil	modafinil	100 mg	Tablet

1. To **treat narcolepsy** where:

- (a) Amphetamines are contraindicated; OR
- (b) Patients over 40 years old who have underlying cardiovascular disease or history of the disease; OR
- (c) Patients have Parkinson's Disease or are unresponsive to methylphenidate (Ritalin) or dexamphetamine.

2. To treat patients with sleep lab confirmed diagnosis of narcolepsy, or idiopathic CNS hypersomnia.

3. To treat Multiple Sclerosis fatigue not responding to amantadine.

02262800 02262819 02262827 02262835 02262843	Strattera	atomoxetine	10 mg 18 mg 25 mg 40 mg 60 mg	Capsule
02318024 02318032 02318040 02318059 02318067	Apo-Atomoxetine	atomoxetine	10 mg 18 mg 25 mg 40 mg 60 mg	Capsule
02445883 02445905 02445913 02445948 02445956	Atomoxetine	atomoxetine	10 mg 18 mg 25 mg 40 mg 60 mg	Capsule
02506807 02506815 02506823 02506831 02506858	Jamp Atomoxetine	atomoxetine	10 mg 18 mg 25 mg 40 mg 60 mg	Capsule
02386410 02386429 02386437 02386445 02386453	Sandoz Atomoxetine	atomoxetine	10 mg 18 mg 25 mg 40 mg 60 mg	Capsule
02314541 02314568 02314576 02314584 02314592 02362511	Teva-Atomoxetine	atomoxetine	10 mg 18 mg 25 mg 40 mg 60 mg 80 mg	Capsule

For treatment of Attention-Deficit Hyperactivity Disorder (ADHD) and must meet the following criteria:

- Patient has a contraindication or intolerance to, or has previously failed treatment with both of the following:

- a) one methylphenidate-based long-acting psychostimulant AND
- b) one amphetamine-based long-acting psychostimulant

Anticonvulsants				
02284294 02284308 02284316	Apo-Oxcarbazepine	oxcarbazepine	150 mg 300 mg 600 mg	Tablet
02242068 02242069	Trileptal	oxcarbazepine	300 mg 600 mg	Tablet
02244673	Trileptal	oxcarbazepine	60 mg/mL	Liquid

For the treatment of patients with refractory partial epilepsy;

(a) when intolerant to other anticonvulsant therapy;

(b) adjunct therapy when current anticonvulsant therapies are not providing adequate seizure control.

02426862 02426870 02426889 02426897	Aptiom	eslicarbazepine	200 mg 400 mg 600 mg 800 mg	Tablet

For use as an adjunctive therapy in patients in the management of refractory partial-onset seizures (POS) in adult patients with epilepsy who are not satisfactorily controlled with conventional therapy and who meet all of the following criteria:

- (a) are under the care of a physician experienced in the treatment of epilepsy,
- (b) are currently receiving two or more antiepileptic drugs, and
- (c) in whom all other antiepileptic drugs are ineffective or not appropriate

02404516 02404524 02404532 02404540 02404559 02404567	Fycompa	perampanel	2 mg 4 mg 6 mg 8 mg 10 mg 12 mg	Tablet
--	----------------	------------	--	--------

For use as an adjunctive therapy in patients in the management of refractory partial-onset seizures (POS) in adult patients with epilepsy who are not satisfactorily controlled with conventional therapy and who meet all of the following criteria:

- (a) are under the care of a physician experienced in the treatment of epilepsy,
- (b) are currently receiving two or more antiepileptic drugs, and
- (c) in whom all other antiepileptic drugs are ineffective or not appropriate

For use as an adjunctive therapy in the management of primary generalized tonic-clonic (PGTC) seizures in adult patients with epilepsy who are not satisfactorily controlled with conventional therapy and who meet all of the following criteria:

- (a) are under the care of a physician experienced in the treatment of epilepsy,
- (b) are currently receiving two or more antiepileptic drugs, and
- (c) in whom all other antiepileptic drugs are ineffective or not appropriate

Calcitonin Gene-related Peptide (CGRP) Antagonists				
02497859 02509474	Ajovy	fremanezumab	225 mg/1.5 mL	Injection

For the prevention of migraine in patients who have a confirmed diagnosis of either:

1. Episodic migraine: headaches for less than 15 days per month for more than 3 months of which at least 4 days per month are with migraine; OR
2. Chronic migraine: headaches for at least 15 days per month for more than 3 months of which at least 8 days per month are with migraine.

Initiation criteria:

- The patient must have experienced an inadequate response¹, intolerance, or contraindication to at least two oral prophylactic migraine medications² of different classes; AND
- The patient must be under the care of a physician who has appropriate experience in the management of migraine headaches; AND
- The physician must provide the number of headache and migraine days per month at the time of initial request for reimbursement.

Initial approval duration: 6 months

Initial Renewal criteria:

- Reduction of at least 50% in the average number of migraine days per month compared with baseline.

Renewal duration: 6 months

Subsequent Renewal criteria:

- Maintenance of 50% reduction in the average number of migraine days per month from baseline.

¹ *Inadequate response to oral prophylactic therapies is defined as less than a 30% reduction in frequency of headache days to an adequate dose and duration of at least two prophylactic medications, which must be of a different class.*

² *Oral prophylactic medication alternatives include:*

- *beta blockers*
- *tricyclic antidepressants*
- *verapamil or flunarizine*
- *sodium valproate or divalproex sodium*
- *topiramate*
- *gabapentin*

02491087 02491060	Emgality	galcanezumab	120 mg/mL	Injection
----------------------	-----------------	--------------	-----------	-----------

For the prevention of migraine in patients who have a confirmed diagnosis of either:

1. Episodic migraine: headaches for less than 15 days per month for more than 3 months of which at least 4 days per month are with migraine; OR
2. Chronic migraine: headaches for at least 15 days per month for more than 3 months of which at least 8 days per month are with migraine.

Initiation criteria:

- The patient must have experienced an inadequate response¹, intolerance, or contraindication to at least two oral prophylactic migraine medications² of different classes; AND
- The patient must be under the care of a physician who has appropriate experience in the management of migraine headaches; AND
- The physician must provide the number of headache and migraine days per month at the time of initial request for reimbursement.

----------	-----------------	--------------	------	----------

For the treatment of severe vernal keratoconjunctivitis (VKC) in patients who meet ALL of the following criteria:

- Patient is between 4 and 18 years of age inclusive; AND
- Diagnosis of severe VKC defined as either:
 - o Grade 3 (severe) or 4 (very severe) on the Bonini scale, OR
 - o Grade 4 (marked) or 5 (severe) on the modified Oxford scale; AND
- Documentation of the baseline severity of signs and symptoms of VKC prior to treatment initiation is provided; AND
- Patient is under the care of a specialist physician with experience in the diagnosis and management of VKC.

Note: Patients previously treated with cyclosporine 0.1% but who discontinued treatment upon resolution of VKC signs and symptoms are eligible to reinitiate treatment if signs and symptoms of severe VKC recur and they meet the initiation criteria.

Initial approval period: 6 months

Discontinuation Criteria:

- Treatment should be discontinued if no improvement in signs and symptoms of VKC is observed; OR
- Treatment should be discontinued once signs and symptoms of VKC have resolved.

GASTROINTESTINAL DRUGS

For the treatment of patients with type 2 diabetes who have previously been treated with metformin and a sulfonylurea. Should be used in patients with diabetes who are not adequately controlled on or are intolerant to metformin and a sulfonylurea, and for whom insulin is not an option.

02443937 02443945	Jardiance	empagliflozin	10 mg 25 mg	Tablet
----------------------	------------------	---------------	----------------	--------

As an adjunct to diet, exercise, and standard care therapy to reduce the incidence of cardiovascular (CV) death in patients with type 2 diabetes mellitus (T2DM) and established cardiovascular disease who have inadequate glycemic control, if the following criteria are met:

- Patients have inadequate glycemic control despite an adequate trial of metformin
- Patients have established cardiovascular disease as defined* in the EMPA-REG OUTCOME trial.

***NOTE:** Established CV disease is defined on the basis of one of the following:

- History of myocardial infarction (MI).
- Multi-vessel coronary artery disease in two or more major coronary arteries (irrespective of revascularization status).
- Single-vessel coronary artery disease with significant stenosis and either a positive non-invasive stress test or discharged from hospital with a documented diagnosis of unstable angina within 12 months prior to selection.
- Last episode of unstable angina > 2 months prior with confirmed evidence of coronary multi-vessel or single-vessel disease.
- History of ischemic or hemorrhagic stroke.
- Occlusive peripheral artery disease.

----------------------	-----------------	--------------	------------------	-----------

For treatment of type 2 diabetes in combination with a basal insulin with or without metformin in patients who have been uncontrolled on, or are intolerant to, a sulfonylurea and metformin.

02478293	Soliqua	insulin glargine/lixisenatide	100 U/33 mcg	Injection
----------	----------------	-------------------------------	--------------	-----------

For treatment of patients with type 2 diabetes who would be eligible for Adlyxine but will also be treated with a basal insulin (less than 60U/day) to achieve adequate glycemic control.

MISCELLANEOUS SKIN AND MUCOUS MEMBRANE AGENTS

02244148 02244149	Protopic	tacrolimus	0.1% 0.03%	Ointment
----------------------	-----------------	------------	---------------	----------

Second-line therapy for short and long-term intermittent-treatment of moderate to severe atopic dermatitis in non-immunocompromised patients, in whom the use of conventional topical corticosteroid therapies are deemed inadvisable because of potential risks, or who are not adequately responsive to or intolerant of conventional therapies.

Note: Both 0.03% and 0.1% for adults and only 0.03% for children aged 2 to 15 years.

02528363 02528371 02528398	Cibinqo	abrocitinib	50 mg 100 mg 200 mg	Tablet
----------------------------------	----------------	-------------	---------------------------	--------

For the treatment of refractory moderate to severe¹ atopic dermatitis (AD), in patients aged 12 years and older, only if the following criteria are met:

Initiation criteria:

- Patient has had an adequate trial² (with a documented refractory disease), or was intolerant (with documented intolerance), or is ineligible for each of the following therapies:
 - o maximally tolerated medical topical therapies for AD combined with phototherapy (where available); AND
 - o maximally tolerated medical topical therapies for AD combined with at least 1 of the 4 systemic immunomodulators (methotrexate, cyclosporine, mycophenolate mofetil, or azathioprine).
- The physician must provide the Eczema Area and Severity Index (EASI) score at the time of initial request for reimbursement.

Initial approval: 6 months

Renewal Criteria:

- The physician must provide proof of beneficial clinical effect when requesting continuation of reimbursement, defined as a 75% or greater improvement from baseline in the EASI score (EASI-75) 6 months after treatment initiation.
- The physician must provide proof of maintenance of EASI-75 response from baseline for subsequent authorizations.

Renewal approval: 1 year

Request for coverage must be made by, or in consultation with, a dermatologist, allergist, clinical immunologist, or pediatrician who has expertise in the management of moderate to severe AD.

Abrocitinib should not be used in combination with phototherapy, any immunomodulatory agents (including biologics) or other Janus kinase [JAK] inhibitor treatment for moderate to severe AD.

¹Moderate to severe atopic dermatitis is defined as an EASI score of 16 points or higher.

² Adequate trials are defined as:

- Phototherapy – 3 times a week for 12 weeks.
- Methotrexate – 10 to 20mg per week for 12 weeks.
- Cyclosporine – 2.5 to 5mg/kg/day for 12 weeks.
- *Mycophenolate mofetil* – 1g twice daily for 12 weeks.
- *Azathioprine* – 1.5 to 2.5mg/kg/day for 12 weeks.

02470365 02492504 02510049 02524252	Dupixent	dupilumab	150 mg/mL 200 mg/1.14 mL 150 mg/mL 200 mg/1.14 mL	Injection
--	-----------------	-----------	--	-----------

For the treatment of moderate-to-severe¹ atopic dermatitis (AD) in patients aged 12 years and older, whose disease is not adequately controlled with topical prescription therapies or when those therapies are not advisable, only if the following criteria are met:

Initiation Criteria

- Patient has had an adequate trial²(with a documented refractory disease), or was intolerant (with documented intolerance), or is ineligible for each of the following therapies:
 - o maximally tolerated medical topical therapies for AD combined with phototherapy (where available); AND
 - o maximally tolerated medical topical therapies for AD combined with at least 1 of the 4 systemic immunomodulators (methotrexate, cyclosporine, mycophenolate mofetil, or azathioprine).
- The physician must provide the Eczema Area and Severity Index (EASI) score at the time of initial request for reimbursement.

Initial approval: 6 months

Renewal Criteria

- The physician must provide proof of beneficial clinical effect when requesting continuation of reimbursement, defined as a 75% or greater improvement from baseline in the EASI score (EASI-75) six months after treatment initiation.
- The physician must provide proof of maintenance of EASI-75 response from baseline every six months for subsequent authorizations.

Request for coverage must be made by, or in consultation with, a dermatologist, allergist, clinical immunologist, or pediatrician who has expertise in the management of moderate-to-severe AD.

Dupilumab should not be used in combination with phototherapy, any immunomodulatory drugs (including biologics or a Janus kinase [JAK] inhibitor treatment) for moderate-to-severe AD.

¹ Moderate-to-severe atopic dermatitis is defined as an EASI score of 16 points or higher

² Adequate trials are defined as:

- Phototherapy – 3 times a week for 12 weeks.
- Methotrexate – 10 to 20mg per week for 12 weeks.
- Cyclosporine – 2.5 to 5mg/kg/day for 12 weeks.
- Mycophenolate mofetil – 1g twice daily for 12 weeks.
- Azathioprine – 1.5 to 2.5mg/kg/day for 12 weeks.

 - o maximally tolerated medical topical therapies for AD combined with phototherapy (where available); AND
 - o maximally tolerated medical topical therapies for AD combined with at least 1 of the 4 systemic immunomodulators (methotrexate, cyclosporine, mycophenolate mofetil, or azathioprine).
- The physician must provide the Eczema Area and Severity Index (EASI) score at the time of initial request for reimbursement.

Initial approval: 6 months

Renewal Criteria:

- The physician must provide proof of beneficial clinical effect when requesting continuation of reimbursement, defined as a 75% or greater improvement from baseline in the EASI score (EASI-75) 6 months after treatment initiation.
- The physician must provide proof of maintenance of EASI-75 response from baseline for subsequent authorizations.

Renewal approval: 1 year

Request for coverage must be made by, or in consultation with, a dermatologist, allergist, clinical immunologist, or pediatrician who has expertise in the management of moderate to severe AD.

Upadacitinib should not be used in combination with phototherapy, any immunomodulatory agents (including biologics) or other Janus kinase [JAK] inhibitor treatment for moderate to severe AD.

¹ Moderate to severe atopic dermatitis is defined as an EASI score of 16 points or higher.

² Adequate trials are defined as:

- Phototherapy – 3 times a week for 12 weeks.
- Methotrexate – 10 to 20mg per week for 12 weeks.
- Cyclosporine – 2.5 to 5mg/kg/day for 12 weeks.
- Mycophenolate mofetil – 1g twice daily for 12 weeks.
- Azathioprine – 1.5 to 2.5mg/kg/day for 12 weeks.

SMOOTH MUSCLE RELAXANTS

02275066	Trosec	trospium	20 mg	Tablet
02488353	Mar-Trospium	trospium	20 mg	Tablet
02506661	JampTrospium	trospium	20 mg	Tablet

Urinary incontinence in patients unable to tolerate or failing immediate release oxybutynin e.g. headache, dry mouth, dyspepsia.

MISCELLANEOUS THERAPEUTIC AGENTS

02298384	Teva-Risedronate	risedronate	30 mg	Tablet
----------	-------------------------	-------------	-------	--------

For the treatment of **Paget's Disease**.

02489597	Evenity	romosozumab	105 mg/1.17 mL	Pre-filled syringe
----------	----------------	-------------	----------------	--------------------

For the treatment of osteoporosis in postmenopausal women only if the following criteria are met:

- History of osteoporotic fracture; AND
- High risk for future fracture, defined as a 10-year fracture risk > 20% as defined by the Fracture Risk Assessment (FRAX) tool; AND
- Treatment naive to osteoporosis medications, except calcium and/or vitamin D.

Maximum duration of reimbursement is 12 months.

Note: Romosozumab will not be reimbursed if prescribed concurrently with other osteoporosis medications, except calcium and/or vitamin D.

02343541	Prolia	denosumab	60 mg/mL	Injection
----------	---------------	-----------	----------	-----------

To increase bone mass in men or postmenopausal women with osteoporosis who are at a high risk for fracture or who have failed or are intolerant to other available osteoporosis therapy, where the following clinical criteria are met:

High fracture risk defined as either:

- moderate 10-year fracture risk (10% to 20%) as defined by either the Canadian Association of Radiologists and Osteoporosis Canada (CAROC) tool or the World Health Organization's Fracture Risk Assessment (FRAX) tool with a prior fragility fracture;

OR

- high 10-year fracture risk ($\geq 20\%$) as defined by either the Canadian Association of Radiologists and Osteoporosis Canada (CAROC) tool or the World Health Organization's Fracture Risk Assessment (FRAX) tool.

AND

Contraindication to oral bisphosphonates.

Notes:

- Bisphosphonate failure will be defined as a fragility fracture and/or evidence of a decline in bone mineral density below pre-treatment baseline levels, despite adherence for one year.
- Contraindication to oral bisphosphonates will be considered. Contraindications include renal impairment, hypersensitivity, and abnormalities of the esophagus (e.g. esophageal stricture or achalasia).

02269198	Aclasta	zoledronic acid	5 mg/100 mL	Injection
02415100	Taro-Zoledronic Acid	zoledronic acid	5 mg/100 mL	Injection
02422433	Zoledronic Acid	zoledronic acid	5 mg/100 mL	Injection

1. Paget's disease.

2. a) For female patients with post-menopausal osteoporosis (PMO) at high risk for fracture and satisfy at least two of the following three criteria:

- (i) Age > 75 years;
- (ii) A prior fragility fracture;
- (iii) A bone mineral density (BMD) T-score ≤ -2.5 ; OR

b) Female patients with PMO with a serious intolerance to oral bisphosphonates or for whom oral bisphosphonates are contraindicated.

02368153	Xgeva	denosumab	120 mg	Injection
----------	--------------	-----------	--------	-----------

For the prevention of skeletal-related events (SREs) in patients with castrate-resistant prostate cancer with one or more documented bony metastases and good performance status (ECOG performance status score of 0, 1 or 2).

Crohn's Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy (e.g. ciprofloxacin and/or metronidazole) AND
- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

Ulcerative Colitis

For the treatment of patients over 18 years of age with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

02402475 02282097	Orencia	abatacept	125 mg/mL 250 mg/vial	Injection
----------------------	----------------	-----------	--------------------------	-----------

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis and who have failed treatment with at least 3 DMARDs (disease-modifying antirheumatic drugs) therapies one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented.

One combination therapy of DMARDs must also be tried.

Request for coverage must be made by a specialist in rheumatology.

02496933	Avsola	infliximab	100 mg/vial	Powder for Solution
----------	---------------	------------	-------------	---------------------

Avsola will be a preferred infliximab option for all infliximab-naïve patients prescribed an infliximab product for Rheumatoid Arthritis, Ankylosing Spondylitis, Crohn's Disease, Ulcerative Colitis, Psoriatic Arthritis, and Psoriasis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different non-steroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Avsola will be a preferred infliximab option for all infliximab-naïve patients prescribed an infliximab product for Ankylosing Spondylitis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients. Patients will not be permitted to switch from Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

Crohn's Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Avsola, Renflexis or Inflectra will be a preferred infliximab option for all infliximab-naïve patients prescribed an infliximab product for Crohn's Disease.

For Pediatrics: Avsola will be a preferred infliximab option for all infliximab-naïve patients prescribed an infliximab product for Crohn's Disease.

Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients. Patients will not be permitted to switch from Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy (e.g. ciprofloxacin and/or metronidazole)

AND

- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Avsola will be a preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Fistulizing Crohn's Disease.

Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients. Patients will not be permitted to switch from Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

Psoriasis

For the treatment of adult patients with severe plaque psoriasis with one or more of the following:

- Psoriasis Area and Severity Index (PASI) ≥ 10 ;
- Body Surface Area (BSA) > 10 percent;
- Dermatology Life Quality Index (DLQI) > 10;
- Significant involvement of the face, hands, feet or genital region; AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

The initial request is approved for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- ≥ 50 percent reduction in the PASI score with ≥ 5 point improvement in the DLQI; OR
- ≥ 75 percent reduction in the PASI score; OR
- ≥ 50 percent reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Avsola will be a preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Psoriasis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients. Patients will not be permitted to switch from Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindication to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Avsola will be a preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Psoriatic Arthritis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients. Patients will not be permitted to switch from Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

Rheumatoid Arthritis

For the treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDS must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Avsola will be a preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Rheumatoid Arthritis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients. Patients will not be permitted to switch from Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

Ulcerative Colitis

For the treatment of patients with moderate to severely active ulcerative colitis who have had an inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Avsola will be a preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Ulcerative Colitis.

For Pediatrics: Avsola will be a preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Ulcerative Colitis.

Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients. Patients will not be permitted to switch from Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

02455323 02455331	Brenzys	etanercept	50 mg/mL	Injection
----------------------	----------------	------------	----------	-----------

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Brenzys will be a preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Ankylosing Spondylitis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients. Patients will not be permitted to switch from Brenzys to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 4 years of age or older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Brenzys will be a preferred etanercept option for all etanercept-naive patients weighing 63kg (138 pounds) or more who are prescribed an etanercept product for Polyarticular Juvenile Idiopathic Arthritis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Brenzys to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

Psoriasis

For the treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) \geq 10
- Body Surface Area (BSA) > 10%
- Significant involvement of the face, hands, feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 3 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- \geq 50% reduction in the PASI score with \geq 5 point improvement in the DLQI
- \geq 75% reduction in the PASI score
- \geq 50% reduction in the BSA with significant improvement of the face, hands, feet or genital region

Request for coverage must be made by a specialist in dermatology.

Brenzys will be a preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Psoriasis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Brenzys to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Brenzys will be a preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Psoriatic Arthritis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Brenzys to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

Rheumatoid Arthritis

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Brenzys will be a preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Rheumatoid Arthritis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients. Patients will not be permitted to switch from Brenzys to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

02462869	Erelzi	etanercept	50 mg/mL	Injection
02462877			25mg/0.5mL	
02462850			50mg/mL	

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Erelzi will be a preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Ankylosing Spondylitis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients. Patients will not be permitted to switch from Erelzi to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 4 years of age or older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Erelzi will be a preferred etanercept option for all etanercept-naive patients weighing 63kg (138 pounds) or more who are prescribed an etanercept product for Polyarticular Juvenile Idiopathic Arthritis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients. Patients will not be permitted to switch from Erelzi to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

Psoriasis

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) $> 10\%$
- Significant involvement of the face, hands feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 3 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- ≥ 50% reduction in the PASI score with ≥ 5 point improvement in the DLQI
- ≥ 75 % reduction in the PASI score
- ≥ 50% reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Erelzi will be a preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Psoriasis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Erelzi to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Erelzi will be a preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Psoriatic Arthritis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Erelzi to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

Rheumatoid Arthritis

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Erelzi will be a preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Rheumatoid Arthritis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Erelzi to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

02274728	Enbrel	etanercept	50 mg/mL	Injection
----------	---------------	------------	----------	-----------

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Erelzi or Brenzys will be the preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Ankylosing Spondylitis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Enbrel, Erelzi or Brenzys to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

Psoriasis

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) \geq 10
- Body Surface Area (BSA) $>$ 10%
- Significant involvement of the face, hands feet or genital region
- Dermatology Life Quality Index (DLQI) $>$ 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 3 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- \geq 50% reduction in the PASI score with \geq 5 point improvement in the DLQI
- \geq 75 % reduction in the PASI score
- \geq 50% reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Erelzi or Brenzys will be the preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Psoriasis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Enbrel, Erelzi or Brenzys to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented.

One combination therapy of DMARD's must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Erelzi or Brenzys will be the preferred etanercept option for all etanercept-naive patients prescribed an etanercept product for Psoriatic Arthritis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naive patients.

Patients will not be permitted to switch from Enbrel, Erelzi or Brenzys to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

Rheumatoid Arthritis

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Erelzi or Brenzys will be the preferred etanercept option for all etanercept-naïve patients prescribed an etanercept product for Rheumatoid Arthritis. Preferred means the first etanercept product to be considered for reimbursement for etanercept-naïve patients.

Patients will not be permitted to switch from Enbrel, Erelzi or Brenzys to another etanercept product or vice versa, if previously trialed and deemed unresponsive to etanercept.

02474263	Humira	adalimumab	20 mg/0.2 mL	Injection
----------	---------------	------------	--------------	-----------

Pediatric Crohn's Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

02258595	Humira	adalimumab	40 mg/0.8 mL	Injection
----------	---------------	------------	--------------	-----------

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, who have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yuflyma will be the preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ankylosing Spondylitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Humira, Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Crohn's Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

For Adults:

Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yuflyma will be the preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Crohn's Disease.

For Pediatrics:

Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz or Idacio will be the preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Humira, Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy (e.g. ciprofloxacin and/or metronidazole) AND
- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yuflyma will be the preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Fistulizing Crohn's Disease. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Humira, Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Hidradenitis Suppurativa

For the treatment of adult patients with active moderate to severe hidradenitis suppurativa who have not responded to conventional therapy (including systemic antibiotics) and who meet all of the following:

- A total abscess and nodule count of 3 or greater
- Lesions in at least two distinct anatomic areas, one of which must be Hurley Stage II or III
- An inadequate response to a 90-day trial of oral antibiotics
- Prescribed by a practitioner with expertise in the management of patients with HS

Note: *Treatment with adalimumab should be discontinued if there is no improvement after 12 weeks of treatment*

Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yuflyma will be the preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Hidradenitis Suppurativa. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Humira, Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yulfyma will be the preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Polyarticular Juvenile Idiopathic Arthritis.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab -naive patients. Patients will not be permitted to switch from Humira, Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yulfyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriasis

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) $> 10\%$
- Significant involvement of the face, hands feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- $\geq 50\%$ reduction in the PASI score with ≥ 5 point improvement in the DLQI
- $\geq 75\%$ reduction in the PASI score
- $\geq 50\%$ reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yulfyma will be the preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriasis.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab -naive patients. Patients will not be permitted to switch from Humira, Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yulfyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented.

One combination therapy of DMARD's must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yulfyma will be the preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriatic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naive patients. Patients will not be permitted to switch from Humira, Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yulfyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Rheumatoid Arthritis

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yuflyma will be the preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Rheumatoid Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Humira, Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Ulcerative Colitis

For the treatment of patients over 18 years of age with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yuflyma will be the preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ulcerative Colitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Humira, Abrilada, Amgevita, Hadlima, Hulio, Hyrimoz, Idacio, Simlandi or Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

02511061	Abrilada	adalimumab	20 mg/0.4 mL	Injection
02511053 02511045	Abrilada	adalimumab	40 mg/0.8 mL	Injection

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, who have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Abrilada will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ankylosing Spondylitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Abrilada to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Crohn's Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Abrilada will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Crohn's Disease.

For Pediatrics: Abrilada will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve

patients. Patients will not be permitted to switch from Abrilada to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy (e.g. ciprofloxacin and/or metronidazole) AND
- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

Abrilada will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Fistulizing Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Abrilada to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Hidradenitis Suppurativa

For the treatment of adult patients with active moderate to severe hidradenitis suppurativa who have not responded to conventional therapy (including systemic antibiotics) and who meet all of the following:

- A total abscess and nodule count of 3 or greater
- Lesions in at least two distinct anatomic areas, one of which must be Hurley Stage II or III
- An inadequate response to a 90-day trial of oral antibiotics
- Prescribed by a practitioner with expertise in the management of patients with HS

Note: Treatment with adalimumab should be discontinued if there is no improvement after 12 weeks of treatment.

Abrilada will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Hidradenitis Suppurativa. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Abrilada to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Abrilada will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Polyarticular Juvenile Idiopathic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients.

Patients will not be permitted to switch from Abrilada to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriasis

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) $> 10\%$

- Significant involvement of the face, hands, feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- ≥ 50% reduction in the PASI score with ≥ 5 point improvement in the DLQI
- ≥ 75 % reduction in the PASI score
- ≥ 50% reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Abrilada will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriasis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Abrilada to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Abrilada will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriatic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Abrilada to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Rheumatoid Arthritis

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Abrilada will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Rheumatoid Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Abrilada to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

For the treatment of patients over 18 years of age with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

Abrilada will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ulcerative Colitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Abrilada to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy (e.g. ciprofloxacin and/or metronidazole) AND
- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

Amgevita will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Fistulizing Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Amgevita to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Hidradenitis Suppurativa

For the treatment of adult patients with active moderate to severe hidradenitis suppurativa who have not responded to conventional therapy (including systemic antibiotics) and who meet all of the following:

- A total abscess and nodule count of 3 or greater
- Lesions in at least two distinct anatomic areas, one of which must be Hurley Stage II or III
- An inadequate response to a 90-day trial of oral antibiotics
- Prescribed by a practitioner with expertise in the management of patients with HS

Note: Treatment with adalimumab should be discontinued if there is no improvement after 12 weeks of treatment.

Amgevita will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Hidradenitis Suppurativa. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Amgevita to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Amgevita will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Polyarticular Juvenile Idiopathic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Amgevita to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriasis

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) $> 10\%$
- Significant involvement of the face, hands, feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- $\geq 50\%$ reduction in the PASI score with ≥ 5 point improvement in the DLQI
- $\geq 75\%$ reduction in the PASI score
- $\geq 50\%$ reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Amgevita will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriasis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Amgevita to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Amgevita will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriatic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Amgevita to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Amgevita will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Rheumatoid Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Amgevita to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Ulcerative Colitis

For the treatment of patients over 18 years of age with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

Amgevita will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ulcerative Colitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Amgevita to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, who have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Hadlima will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ankylosing Spondylitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hadlima to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Crohn's Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Hadlima will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hadlima to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy (e.g. ciprofloxacin and/or metronidazole) AND
- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

Hadlima will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Fistulizing Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hadlima to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Hidradenitis Suppurativa

For the treatment of adult patients with active moderate to severe hidradenitis suppurativa who have not responded to conventional therapy (including systemic antibiotics) and who meet all of the following:

- A total abscess and nodule count of 3 or greater
- Lesions in at least two distinct anatomic areas, one of which must be Hurley Stage II or III
- An inadequate response to a 90-day trial of oral antibiotics
- Prescribed by a practitioner with expertise in the management of patients with HS

Note: Treatment with adalimumab should be discontinued if there is no improvement after 12 weeks of treatment.

Hadlima will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Hidradenitis Suppurativa. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hadlima to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Hadlima will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Polyarticular Juvenile Idiopathic Arthritis. For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, who have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Hulio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ankylosing Spondylitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hulio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Crohn's Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Hulio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Crohn's Disease.

For Pediatrics: Hulio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hulio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy (e.g. ciprofloxacin and/or metronidazole) AND
- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

Hulio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Fistulizing Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hulio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Hidradenitis Suppurativa

For the treatment of adult patients with active moderate to severe hidradenitis suppurativa who have not responded to conventional therapy (including systemic antibiotics) and who meet all of the following:

- A total abscess and nodule count of 3 or greater
- Lesions in at least two distinct anatomic areas, one of which must be Hurley Stage II or III
- An inadequate response to a 90-day trial of oral antibiotics
- Prescribed by a practitioner with expertise in the management of patients with HS

Note: Treatment with adalimumab should be discontinued if there is no improvement after 12 weeks of treatment.

Hulio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Hidradenitis Suppurativa. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hulio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Hulio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Polyarticular Juvenile Idiopathic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hulio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One

combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Hulio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriatic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hulio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriasis

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) $> 10\%$
- Significant involvement of the face, hands, feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- $\geq 50\%$ reduction in the PASI score with ≥ 5 point improvement in the DLQI
- $\geq 75\%$ reduction in the PASI score
- $\geq 50\%$ reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Hulio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriasis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hulio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Rheumatoid Arthritis

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Hulio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Rheumatoid Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hulio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Ulcerative Colitis

For the treatment of patients over 18 years of age with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

Hulio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ulcerative Colitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hulio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

02542331			40mg/0.4mL	
02542315			20mg/0.2mL	

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, who have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Hyrimoz will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ankylosing Spondylitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hyrimoz to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Crohn’s Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Hyrimoz will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Crohn's Disease.

For Pediatrics: Hyrimoz will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Crohn's Disease

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hyrimoz to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy (e.g. ciprofloxacin and/or metronidazole) AND

- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

Hyrmoz will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Fistulizing Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hyrmoz to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Hidradenitis Suppurativa

For the treatment of adult patients with active moderate to severe hidradenitis suppurativa who have not responded to conventional therapy (including systemic antibiotics) and who meet all of the following:

- A total abscess and nodule count of 3 or greater
- Lesions in at least two distinct anatomic areas, one of which must be Hurley Stage II or III
- An inadequate response to a 90-day trial of oral antibiotics
- Prescribed by a practitioner with expertise in the management of patients with HS

Note: Treatment with adalimumab should be discontinued if there is no improvement after 12 weeks of treatment.

Hyrmoz will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Hidradenitis Suppurativa. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hyrmoz to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Hyrmoz will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Polyarticular Juvenile Idiopathic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients.

Patients will not be permitted to switch from Hyrmoz to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Hyrimoz will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriatic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naive patients. Patients will not be permitted to switch from Hyrimoz to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriasis

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) $> 10\%$
- Significant involvement of the face, hands, feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- $\geq 50\%$ reduction in the PASI score with ≥ 5 point improvement in the DLQI
- $\geq 75\%$ reduction in the PASI score
- $\geq 50\%$ reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Hyrimoz will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriasis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naive patients. Patients will not be permitted to switch from Hyrimoz to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Rheumatoid Arthritis

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Hyrimoz will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Rheumatoid Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naive patients. Patients will not be permitted to switch from Hyrimoz to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Ulcerative Colitis

For the treatment of patients over 18 years of age with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

Hyrimoz will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ulcerative Colitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Hyrimoz to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

02502674	Idacio	adalimumab	40 mg/0.8 mL	Injection
02502682	Idacio	adalimumab	40 mg/0.8 mL	Pre-filled Syringe

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, who have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Idacio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ankylosing Spondylitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Idacio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Crohn's Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Idacio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Crohn's Disease.

For Pediatrics: Idacio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Idacio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy (e.g. ciprofloxacin and/or metronidazole) AND
- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

Idacio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Fistulizing Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Idacio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Hidradenitis Suppurativa

For the treatment of adult patients with active moderate to severe hidradenitis suppurativa who have not responded to conventional therapy (including systemic antibiotics) and who meet all of the following:

- A total abscess and nodule count of 3 or greater
- Lesions in at least two distinct anatomic areas, one of which must be Hurley Stage II or III
- An inadequate response to a 90-day trial of oral antibiotics
- Prescribed by a practitioner with expertise in the management of patients with HS

Note: Treatment with adalimumab should be discontinued if there is no improvement after 12 weeks of treatment.

Idacio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Hidradenitis Suppurativa. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Idacio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Idacio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Polyarticular Juvenile Idiopathic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Idacio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriasis

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) $> 10\%$
- Significant involvement of the face, hands, feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- $\geq 50\%$ reduction in the PASI score with ≥ 5 point improvement in the DLQI
- $\geq 75\%$ reduction in the PASI score
- $\geq 50\%$ reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Idacio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriasis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Idacio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Idacio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriatic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Idacio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Rheumatoid Arthritis

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Idacio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Rheumatoid Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Idacio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Ulcerative Colitis

For the treatment of patients over 18 years of age with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

Idacio will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ulcerative Colitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Idacio to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

02523965	Simlandi	adalimumab	80 mg/0.8 mL	Injection

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, who have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Simlandi will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ankylosing Spondylitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Simlandi to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Crohn's Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Simlandi will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Simlandi to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy (e.g. ciprofloxacin and/or metronidazole) AND
- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

Simlandi will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Fistulizing Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Simlandi to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Hidradenitis Suppurativa

For the treatment of adult patients with active moderate to severe hidradenitis suppurativa who have not responded to conventional therapy (including systemic antibiotics) and who meet all of the following:

- A total abscess and nodule count of 3 or greater
- Lesions in at least two distinct anatomic areas, one of which must be Hurley Stage II or III
- An inadequate response to a 90-day trial of oral antibiotics
- Prescribed by a practitioner with expertise in the management of patients with HS

Note: Treatment with adalimumab should be discontinued if there is no improvement after 12 weeks of treatment.

Simlandi will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Hidradenitis Suppurativa. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Simlandi to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Simlandi will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Polyarticular Juvenile Idiopathic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Simlandi to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriasis

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) $> 10\%$
- Significant involvement of the face, hands, feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- $\geq 50\%$ reduction in the PASI score with ≥ 5 point improvement in the DLQI
- $\geq 75\%$ reduction in the PASI score

- $\geq 50\%$ reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Simlandi will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriasis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Simlandi to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Simlandi will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriatic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Simlandi to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Rheumatoid Arthritis

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Simlandi will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Rheumatoid Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Simlandi to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Ulcerative Colitis

For the treatment of patients over 18 years of age with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

Simlandi will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ulcerative Colitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Simlandi to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, who have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Yuflyma will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ankylosing Spondylitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Crohn's Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Yuflyma will be a preferred adalimumab option for all adalimumab-naïve patients.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy (e.g. ciprofloxacin and/or metronidazole) AND
- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

Yuflyma will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Fistulizing Crohn's Disease.

Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Hidradenitis Suppurativa

For the treatment of adult patients with active moderate to severe hidradenitis suppurativa who have not responded to conventional therapy (including systemic antibiotics) and who meet all of the following:

- A total abscess and nodule count of 3 or greater
- Lesions in at least two distinct anatomic areas, one of which must be Hurley Stage II or III
- An inadequate response to a 90-day trial of oral antibiotics
- Prescribed by a practitioner with expertise in the management of patients with HS

Note: Treatment with adalimumab should be discontinued if there is no improvement after 12 weeks of treatment.

Yuflyma will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Hidradenitis Suppurativa. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Yuflyma will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Polyarticular Juvenile Idiopathic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriasis

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) \geq 10
- Body Surface Area (BSA) $>$ 10%
- Significant involvement of the face, hands, feet or genital region
- Dermatology Life Quality Index (DLQI) $>$ 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- \geq 50% reduction in the PASI score with \geq 5 point improvement in the DLQI
- \geq 75 % reduction in the PASI score
- \geq 50% reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Yuflyma will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriasis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naïve patients. Patients will not be permitted to switch from Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Yuflyma will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Psoriatic Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naive patients. Patients will not be permitted to switch from Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Rheumatoid Arthritis

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented.

One combination therapy of DMARDs must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Yuflyma will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Rheumatoid Arthritis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naive patients. Patients will not be permitted to switch from Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

Ulcerative Colitis

For the treatment of patients over 18 years of age with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

Yuflyma will be a preferred adalimumab option for all adalimumab-naïve patients prescribed an adalimumab product for Ulcerative Colitis. Preferred means the first adalimumab product to be considered for reimbursement for adalimumab-naive patients. Patients will not be permitted to switch from Yuflyma to another adalimumab product or vice versa, if:

- Previously trialed and deemed unresponsive to adalimumab.

02460521	Kevzara	sarilumab	150 mg/1.14 mL	Injection
02460548			200 mg/1.14 mL	
02472961			150 mg/1.14 mL	
02472988			200 mg/1.14 mL	

For the treatment of patients over 18 years of age who have moderate to severe active **rheumatoid arthritis** who have failed treatment with at least 3 DMARD

(disease modifying antirheumatic drug) therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented.

One combination therapy of DMARDs must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

----------	----------------	----------	-----------	-----------

Rheumatoid Arthritis

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARD's must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

02470373	Renflexis	infliximab	100 mg	Injection
----------	------------------	------------	--------	-----------

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different non-steroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Renflexis will be a preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Ankylosing Spondylitis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients. Patients will not be permitted to switch from Renflexis to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

Crohn's Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Renflexis will be a preferred infliximab option for all infliximab-naive adult patients prescribed an infliximab product for Crohn's Disease.
For Pediatrics: Renflexis will be a preferred infliximab option for all infliximab-naive pediatric patients prescribed an infliximab product for Crohn's Disease.
Preferred means the first fliximab product to be considered for reimbursement for infliximab-naive patients.
Patients will not be permitted to switch from Renflexis to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy (e.g. ciprofloxacin and/or metronidazole) AND
- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

For Adults : Renflexis will be a preferred infliximab option for all infliximab-naive adult patients prescribed an infliximab product for Fistulizing Crohn's Disease.
For Pediatrics: Renflexis will be a preferred infliximab option for all infliximab-naive pediatric patients prescribed an infliximab product for Fistulizing Crohn's Disease.

Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients.

Patients will not be permitted to switch from Renflexis to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

Psoriasis

For the treatment of adult patients with severe plaque psoriasis with one or more of the following:

- Psoriasis Area and Severity Index (PASI) ≥ 10 ;
- Body Surface Area (BSA) > 10 percent;
- Dermatology Life Quality Index (DLQI) > 10 ;
- Significant involvement of the face, hands, feet or genital region; AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

The initial request is approved for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

≥ 50 percent reduction in the PASI score with ≥ 5 point improvement in the DLQI; OR

≥ 75 percent reduction in the PASI score; OR

≥ 50 percent reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Renflexis will be a preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Psoriasis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients.

Patients will not be permitted to switch from Renflexis to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindication to these agents is documented. One combination therapy of DMARD must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Renflexis will be a preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Psoriatic Arthritis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients.

Patients will not be permitted to switch from Renflexis to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

Rheumatoid Arthritis

For the treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Renflexis will be a preferred infliximab option for all infliximab-naive patients

prescribed an infliximab product for Rheumatoid Arthritis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients. Patients will not be permitted to switch from Renflexis to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

Ulcerative Colitis

For the treatment of patients with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Renflexis will be a preferred infliximab option for all infliximab-naïve adult patients prescribed an infliximab product for Ulcerative Colitis.

For Pediatrics: Renflexis will be a preferred infliximab option for all infliximab-naïve pediatric patients prescribed an infliximab product for Ulcerative Colitis.

Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Patients will not be permitted to switch from Renflexis to another infliximab product or vice versa, if previously trialed and deemed unresponsive to infliximab.

02419475	Inflectra	infliximab	100 mg/vL	Injection
----------	------------------	------------	-----------	-----------

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different non-steroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Inflectra will be a preferred infliximab option for all infliximab-naïve patients prescribed an infliximab product for Ankylosing Spondylitis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Patients will not be permitted to switch from Inflectra to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Crohn's Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Inflectra will be a preferred infliximab option for all infliximab-naïve adult patients prescribed an infliximab product for Crohn's Disease.

For Pediatrics: Inflectra will be a preferred infliximab option for all infliximab-naïve pediatric patients prescribed an infliximab product for Crohn's Disease.

Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Patients will not be permitted to switch from Inflectra to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy

(e.g. ciprofloxacin and/or metronidazole) AND

- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Inflectra will be a preferred infliximab option for all infliximab-naive adult patients prescribed an infliximab product for Fistulizing Crohn's Disease.

For Pediatrics: Inflectra will be a preferred infliximab option for all infliximab-naive pediatric patients prescribed an infliximab product for Fistulizing Crohn's Disease.

Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients.

Patients will not be permitted to switch from Inflectra to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Psoriasis

For the treatment of adult patients with severe plaque psoriasis with one or more of the following:

- Psoriasis Area and Severity Index (PASI) \geq 10;
- Body Surface Area (BSA) $>$ 10 percent;
- Dermatology Life Quality Index (DLQI) $>$ 10;
- Significant involvement of the face, hands, feet or genital region; AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

The initial request is approved for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

\geq 50 percent reduction in the PASI score with \geq point improvement in the DLQI; OR

\geq 75 percent reduction in the PASI score; OR

\geq 50 percent reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Inflectra will be a preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Psoriasis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients.

Patients will not be permitted to switch from Inflectra to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindication to these agents is documented. One combination therapy of DMARD must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Inflectra will be a preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Psoriatic Arthritis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients.

Patients will not be permitted to switch from Inflectra to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Rheumatoid Arthritis

For the treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Inflectra will be a preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Rheumatoid Arthritis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients. Patients will not be permitted to switch from Inflectra to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Ulcerative Colitis

For the treatment of patients with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

For Adults : Inflectra will be a preferred infliximab option for all infliximab-naive adult patients prescribed an infliximab product for Ulcerative Colitis.

For Pediatrics : Inflectra will be a preferred infliximab option for all infliximab-naive pediatric patients prescribed an infliximab product for Ulcerative Colitis.

Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients.

Patients will not be permitted to switch from Inflectra to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

02244016	Remicade	infliximab	100 mg/10 mL	Injection
----------	-----------------	------------	--------------	-----------

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different non-steroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Request for coverage must be made by a specialist in rheumatology.

Renflexis, Inflectra or Avsola will be the preferred infliximab option for all infliximab-naive patients prescribed an infliximab product for Ankylosing Spondylitis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naive patients.

Patients will not be permitted to switch from Remicade, Renflexis, Inflectra or Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Crohn's Disease

For treatment of moderate to severely active Crohn's Disease in patients with inadequate response, intolerance or contraindications to an adequate course of corticosteroids AND an immunosuppressive agent.

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Renflexis, Inflectra or Avsola will be the preferred infliximab option for all infliximab-naive adult patients prescribed an infliximab product for Crohn's Disease.

For Pediatrics: Renflexis, Inflectra or Avsola will be the preferred infliximab option for all infliximab-naive pediatric patients prescribed an infliximab product for Crohn's Disease.

Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Patients will not be permitted to switch from Remicade, Renflexis, Inflectra or Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Fistulizing Crohn's Disease

For the treatment of Fistulizing Crohn's Disease in patients with actively draining perianal or enterocutaneous fistula who meet the following criteria:

- Presence of fistula that has persisted despite a course of antibiotic therapy (e.g. ciprofloxacin and/or metronidazole) AND
- Have had inadequate response, intolerance or contraindications to an immunosuppressive agent (e.g. azathioprine or 6 mercaptopurine).

Request for coverage must be made by a specialist in gastroenterology.

For Adults: Renflexis, Inflectra or Avsola will be the preferred infliximab option for all infliximab-naïve adult patients prescribed an infliximab product for Fistulizing Crohn's Disease.

For Pediatrics: Renflexis, Inflectra or Avsola will be the preferred infliximab option for all infliximab-naïve pediatric patients prescribed an infliximab product for Fistulizing Crohn's Disease.

Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Patients will not be permitted to switch from Remicade, Renflexis, Inflectra or Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Psoriasis

For the treatment of adult patients with severe plaque psoriasis with one or more of the following:

- Psoriasis Area and Severity Index (PASI) ≥ 10 ;
- Body Surface Area (BSA) > 10 percent;
- Dermatology Life Quality Index (DLQI) > 10 ;
- Significant involvement of the face, hands, feet or genital region; AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

The initial request is approved for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

≥ 50 percent reduction in the PASI score with ≥ 5 point improvement in the DLQI; OR

≥ 75 percent reduction in the PASI score; OR

≥ 50 percent reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

Renflexis, Inflectra or Avsola will be the preferred infliximab option for all infliximab-naïve patients prescribed an infliximab product for Psoriasis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Patients will not be permitted to switch from Remicade, Renflexis, Inflectra or Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindication to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Renflexis, Inflectra or Avsola will be the preferred infliximab option for all infliximab-naïve patients prescribed an infliximab product for Psoriatic Arthritis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Patients will not be permitted to switch from Remicade, Renflexis, Inflectra or Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Rheumatoid Arthritis

For the treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Renflexis, Inflectra or Avsola will be the preferred infliximab option for all infliximab-naïve patients prescribed an infliximab product for Rheumatoid Arthritis. Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Patients will not be permitted to switch from Remicade, Renflexis, Inflectra or Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Ulcerative Colitis

For the treatment of patients with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

For Adults : Renflexis, Inflectra or Avsola will be the preferred infliximab option for all infliximab-naïve adult patients prescribed an infliximab product for Ulcerative Colitis.

For Pediatrics : Renflexis, Inflectra or Avsola will be the preferred infliximab option for all infliximab-naïve pediatric patients prescribed an infliximab product for Ulcerative Colitis.

Preferred means the first infliximab product to be considered for reimbursement for infliximab-naïve patients.

Patients will not be permitted to switch from Remicade, Renflexis, Inflectra or Avsola to another infliximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

02505991	Zeposia	ozanimod	0.92mg	Capsule

Ulcerative Colitis

For the treatment of patients over 18 years of age with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

02495155	Rinvoq	upadacitinib	15 mg	Tablet
----------	---------------	--------------	-------	--------

Rheumatoid Arthritis

For the treatment of patients 18 years of age or older who have moderate to severe active rheumatoid arthritis and have:

- (a) failed treatment with at least 3 DMARD therapies, one of which is methotrexate or leflunomide or both, unless intolerance or contraindications to these agents is documented;
- (b) tried one combination therapy of DMARDs; and
- (c) documented disease activity (such as the number of tender joints, the number of swollen joints, the erythrocyte sedimentation rate or C-reactive protein value).

NOTE: Coverage will be provided only if prescribed by a specialist in rheumatology.

Combined use with other biologic drugs or Janus kinase (JAK) inhibitors will not be reimbursed.

Psoriatic Arthritis

For treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented.

One combination therapy of DMARD's must also be tried.

Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Combined use with other biologic drugs or Janus kinase (JAK) inhibitors will not be reimbursed.

2480018	Olumiant	baricitinib	2 mg	Tablet
---------	-----------------	-------------	------	--------

For the treatment of patients 18 years of age or older who have moderate to severe active rheumatoid arthritis and have:

- (a) failed treatment with at least 3 DMARD therapies, one of which is methotrexate or leflunomide or both, unless intolerance or contraindications to these agents is documented;
- (b) tried one combination therapy of DMARDs; and
- (c) documented disease activity (such as the number of tender joints, the number of swollen joints, the erythrocyte sedimentation rate or C-reactive protein value).

NOTE: Coverage will be provided only if prescribed by a specialist in rheumatology.

Combined use with other biologic drugs or Janus kinase (JAK) inhibitors will not be reimbursed.

02470608	Xeljanz XR	tofacitinib	11 mg	Tablet
----------	-------------------	-------------	-------	--------

For the treatment of patients 18 years of age or older who have moderate to severe active rheumatoid arthritis and have:

- (a) failed treatment with at least 3 DMARD therapies, one of which is methotrexate or leflunomide or both, unless intolerance or contraindications to these agents is documented;
- (b) tried one combination therapy of DMARDs; and
- (c) documented disease activity (such as the number of tender joints, the number of swollen joints, the erythrocyte sedimentation rate or C-reactive protein value).

NOTE: Coverage will be provided only if prescribed by a specialist in rheumatology.

Combined use with other biologic drugs or Janus kinase (JAK) inhibitors will not be reimbursed.

02241927	Rituxan	rituximab	10 mg/mL	Injection
----------	----------------	-----------	----------	-----------

Rheumatoid Arthritis

For the treatment of severely active rheumatoid arthritis (RA), in combination with methotrexate, for patients who have failed to respond to an adequate trial of one or more anti-tumor necrosis factor (anti-TNF) agents (monoclonal antibody OR fusion protein) OR who are contraindicated to anti-TNF agents.

Request for coverage must be made by a specialist in rheumatology.

Riabni, Riximyo, Ruxience or Truxima will be the preferred rituximab option for all rituximab-naive patients prescribed a rituximab product for Rheumatoid Arthritis. Preferred means the first rituximab product to be considered for reimbursement for rituximab-naive patients.

Patients will not be permitted to switch from Riabi, Rituxan, Riximyo, Ruxience or Truxima to another rituximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Granulomatosis with Polyangiitis (GPA) and Microscopic Polyangiitis (MPA)

As induction-remission therapy for patients with severely active granulomatosis with polyangiitis (GPA) and microscopic polyangiitis (MPA) in whom the cyclophosphamide has failed; or the use of cyclophosphamide is not appropriate.

Riabni, Riximyo, Ruxience or Truxima will be the preferred rituximab option for all rituximab-naive patients prescribed a rituximab product for GPA and MPA. Preferred means the first rituximab product to be considered for reimbursement for rituximab-naive patients.

Patients will not be permitted to switch from Riabni, Rituxan, Riximyo, Ruxience or Truxima to another rituximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

02498316	Riximyo	rituximab	10 mg/mL	Injection

Patients will not be permitted to switch from Ruxience to another rituximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Rheumatoid Arthritis

For the treatment of severely active rheumatoid arthritis (RA), in combination with methotrexate, for patients who have failed to respond to an adequate trial of one or more anti-tumor necrosis factor (anti-TNF) agents (monoclonal antibody OR fusion protein) OR who are contraindicated to anti-TNF agents.

Request for coverage must be made by a specialist in rheumatology.

Ruxience will be a preferred rituximab option for all rituximab-naive patients prescribed a rituximab product for Rheumatoid Arthritis. Preferred means the first rituximab product to be considered for reimbursement for rituximab-naive patients. Patients will not be permitted to switch from Ruxience to another rituximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

02478382 02478390	Truxima	rituximab	100 mg/10 mL 500 mg/50 mL	Injection
----------------------	----------------	-----------	------------------------------	-----------

Granulomatosis with Polyangiitis (GPA) and Microscopic Polyangiitis (MPA)

As induction-remission therapy for patients with severely active granulomatosis with polyangiitis (GPA) and microscopic polyangiitis (MPA) in whom:

- the use of cyclophosphamide has failed; or
- the use of cyclophosphamide is not appropriate

Truxima will be a preferred rituximab option for all rituximab-naive patients prescribed a rituximab product for GPA and MPA. Preferred means the first rituximab product to be considered for reimbursement for rituximab-naive patients. Patients will not be permitted to switch from Truxima to another rituximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

Rheumatoid Arthritis

For the treatment of severely active rheumatoid arthritis (RA), in combination with methotrexate, for patients who have failed to respond to an adequate trial of one or more anti-tumor necrosis factor (anti-TNF) agents (monoclonal antibody OR fusion protein) OR who are contraindicated to anti-TNF agents.

Request for coverage must be made by a specialist in rheumatology.

Truxima will be a preferred rituximab option for all rituximab-naive patients prescribed a rituximab product for Rheumatoid Arthritis. Preferred means the first rituximab product to be considered for reimbursement for rituximab-naive patients. Patients will not be permitted to switch from Truxima to another rituximab product or vice versa, if previously trialed and deemed unresponsive to therapy.

02424770 02483327	Actemra	tocilizumab	162 mg/0.9 mL 162 mg/0.9 mL	Injection
----------------------	----------------	-------------	--------------------------------	-----------

Giant Cell Arteritis

For treatment of Giant Cell Arteritis (GCA) in adult patients where the following criteria are met:

- At initiation of therapy, or with relapse, patients should be receiving prednisone.
- Duration of therapy with tocilizumab should be limited to 52 weeks per treatment course.

Patients should be under the care of a physician with the experience of diagnosis and management of GCA.

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Rheumatoid Arthritis

For the treatment of adult patients who have moderate to severe active rheumatoid arthritis and who:

- (i) failed treatment with at least 3 DMARD (disease-modifying antirheumatic drugs) therapies, one of which therapies must be either methotrexate or leflunomide, unless intolerance or contraindication to these therapies is documented; and
- (ii) previously tried at least one combination of DMARD therapies.

Request for coverage must be made by a specialist in rheumatology.

Systemic Juvenile Idiopathic Arthritis

For the treatment of active systemic juvenile idiopathic arthritis (sJIA) in patients 2 years of age and older who:

- (i) have responded inadequately to previous therapy with one or more non steroidal anti-inflammatory drugs; and
- (ii) who have responded inadequately to previous therapy with one or more systemic corticosteroids.

02350092 02350106 02350114	Actemra	tocilizumab	80 mg/4 mL 200 mg/10 mL 400 mg/20 mL	Injection
----------------------------------	----------------	-------------	--	-----------

Polyarticular Juvenile Idiopathic Arthritis

For the treatment of active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older who are intolerant to or have inadequate response to one or more disease-modifying anti-rheumatic drugs (DMARDs).

Request for coverage must be made by a specialist in rheumatology.

Rheumatoid Arthritis

For the treatment of adult patients who have moderate to severe active rheumatoid arthritis and who:

- (i) failed treatment with at least 3 DMARD (disease-modifying antirheumatic drugs) therapies, one of which therapies must be either methotrexate or leflunomide, unless intolerance or contraindication to these therapies is documented; and
- (ii) previously tried at least one combination of DMARD therapies.

Request for coverage must be made by a specialist in rheumatology.

Systemic Juvenile Idiopathic Arthritis

For the treatment of active systemic juvenile idiopathic arthritis (sJIA) in patients 2 years of age

and older who:

- (i) have responded inadequately to previous therapy with one or more non steroidal anti-inflammatory drugs; and
- (ii) who have responded inadequately to previous therapy with one or more systemic corticosteroids.

02324776 02324784 02413175 02413183	Simponi	golimumab	50 mcg/0.5 mL 50 mcg/0.5 mL 100 mg/1 mL 100 mg/1 mL	Injection
--	----------------	-----------	--	-----------

Ankylosing Spondylitis

For the treatment of patients with active ankylosing spondylitis who have failed to respond to an adequate trial of at least three different nonsteroidal anti-inflammatory drugs (NSAIDs) and, in patients with peripheral joint involvement, have failed to respond to methotrexate or sulfasalazine.

Psoriatic Arthritis

For the treatment of patients over 18 years of age who have active psoriatic arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also have been tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

Rheumatoid Arthritis

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Ulcerative Colitis

For the treatment of patients over 18 years of age with moderate to severely active ulcerative colitis who have had inadequate response, intolerance or contraindications to conventional therapy including 5-aminosalicylate compounds AND corticosteroids.

Request for coverage must be made by a specialist in gastroenterology.

02417472	Simponi IV	golimumab	50 mg/4 mL	Injection
----------	-------------------	-----------	------------	-----------

Rheumatoid Arthritis

For treatment of patients over 18 years of age who have moderate to severe active rheumatoid arthritis who have failed treatment with at least 3 DMARD therapies, one of which is methotrexate and/or leflunomide unless intolerance or contraindications to these agents is documented. One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

One combination therapy of DMARDs must also be tried. Initial application information should include information on disease activity such as the number of tender joints, swollen joints, erythrocyte sedimentation rate and C-reactive protein value.

Request for coverage must be made by a specialist in rheumatology.

02516098	Ilumya	tildrakizumab	100 mg/mL	Injection
----------	---------------	---------------	-----------	-----------

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) > 10%
- Significant involvement of the face, hands, feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- ≥ 50% reduction in the PASI score with ≥ 5 point improvement in the DLQI
- ≥ 75 % reduction in the PASI score
- ≥ 50% reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

02519283 02519291	Skyrizi	risankizumab	150 mg/mL	Injection

For treatment of adult patients with severe plaque psoriasis presently with one or more of the following:

- Psoriasis Area and the Severity Index (PASI) ≥ 10
- Body Surface Area (BSA) $> 10\%$
- Significant involvement of the face, hands feet or genital region
- Dermatology Life Quality Index (DLQI) > 10 AND
- Failure to respond to, contraindications to, intolerant of or unable to access methotrexate, cyclosporine and/or phototherapy.

Coverage will be approved initially for a maximum of 4 months. For continued coverage the physician must confirm the patient's response to treatment and demonstration of treatment clinical benefits:

- $\geq 50\%$ reduction in the PASI score with ≥ 5 point improvement in the DLQI
- $\geq 75\%$ reduction in the PASI score
- $\geq 50\%$ reduction in the BSA with significant improvement of the face, hands, feet or genital region.

Request for coverage must be made by a specialist in dermatology.

02522845	Saphnelo	anifrolumab	150mg/mL	Injection
----------	-----------------	-------------	----------	-----------

For the treatment of adult patients with moderate to severe autoantibody positive, systemic lupus erythematosus (SLE), only if the following criteria are met:

Initiation Criteria:

- Systemic Lupus Erythematosus Disease Activity Index 2000 (SLEDAI-2K) score of at least 6 prior to treatment initiation with anifrolumab; AND
- Inadequately controlled with oral corticosteroids (OCS) at a dose of at least 10 mg/day of prednisone or its equivalent, in addition to standard therapy¹.

The pre-treatment baseline SLEDAI-2K score must be provided. If the British Isles Lupus Activity Group (BILAG)-2004 will be used for assessment on renewal, then a pre-treatment baseline BILAG-2004 assessment of organ systems must also be provided. The same scale should be used both at baseline and all subsequent renewals.

Initial approval: 12 months

Exclusion Criteria:

- Severe or unstable neuropsychiatric SLE; OR
- Active severe SLE nephritis

Renewal Criteria:

- Decrease in OCS dose to ≤ 7.5 mg/day of prednisone or its equivalent²; AND
- Reduction in disease activity as measured by:

- o R eduction in the SLEDAI-2K score to 5 or less; OR
- o BILAG-2004 score improvement³ in organ systems and no new worsening⁴.

Subsequent Renewal Criteria:

Initial response achieved after the first 12 months of therapy with anifrolumab has been maintained.

Renewal approval: 12 months

¹Standard therapy includes using an immunosuppressive drug (e.g., azathioprine, hydroxychloroquine, methotrexate, mycophenolate) with or without non-steroidal anti-inflammatory drugs (NSAIDs).

²Patients whose OCS dose remains > 7.5 mg/day of prednisone or equivalent but has decreased by at least 50% from baseline could be considered to have achieved the OCS dose reduction.

³BILAG improvement in organ systems is defined as a reduction of all baseline severe (BILAG-2004 A) or moderately severe (BILAG-2004 B) to lower rating levels.

⁴BILAG worsening in organ systems is defined as ≥ 1 new BILAG-2004 A or ≥2 new BILAG-2004 B items.

Combined use with other biologics for the treatment of SLE will not be reimbursed.

Request for coverage must be made by a specialist in rheumatology.

Nypozi will be a preferred filgrastim option for all filgrastim-naive patients. Preferred means the first filgrastim product to be considered for reimbursement for filgrastim-naive patients.

02387174	Dificid	fidaxomicin	200 mg	Tablet
----------	----------------	-------------	--------	--------

For the treatment of patients:

- (a) in place of vancomycin if there is a documented allergy to vancomycin; or
- (b) as an alternative to vancomycin if a patient experiences a "severe adverse reaction" to vancomycin therapy; or
- (c) treatment that results in the discontinuation of vancomycin;
- (d) as an alternative to vancomycin if a patient experiences a 'severe intolerance' to vancomycin treatment that results in the discontinuation of vancomycin therapy; or
- (e) for use in the event of vancomycin treatment failure.

In addition to the above, for use in prior Clostridium Difficile Infection (CDI) situations after other current CDI treatment options fail.

For the treatment of adult patients who have a diagnosis of mild to moderate idiopathic pulmonary fibrosis (IPF)* confirmed by a respirologist and a high-resolution CT scan within the previous 24 months.

*Mild-moderate IPF is defined as: forced vital capacity (FVC) greater than or equal to 50% of predicted.

02443066 02443074	Ofev	nintedanib	100 mg 150 mg	Capsule
----------------------	-------------	------------	------------------	---------

For the treatment of adult patients who have a diagnosis of mild to moderate idiopathic pulmonary fibrosis (IPF)* confirmed by a respirologist and a high-resolution CT scan within the previous 24 months.

*Mild-moderate IPF is defined as: forced vital capacity (FVC) greater than or equal to 50% of predicted.

Chronic fibrosing interstitial lung diseases

Initiation criteria:

- The patient has a diagnosis of chronic fibrosing interstitial lung disease with a progressive phenotype confirmed by a specialist in interstitial lung diseases.
- The patient has a forced vital capacity greater than or equal to 45% of predicted.

Renewal criteria:

- The patient must not experience a more severe progression of disease, defined as an absolute decline in percent predicted forced vital capacity of 10% or greater over the preceding year of treatment with nintedanib.
- The patient's clinical status should be evaluated every 12 months.

Prescribing conditions:

- The patient's condition has been assessed by a specialist with experience in the diagnosis and management of interstitial lung diseases.
- Concurrent treatment of nintedanib with pirfenidone should not be reimbursed.

02470632	Trispan	triamcinolone hexacetonide	20 mg/mL	Injection
----------	----------------	----------------------------	----------	-----------

For the management of pediatric chronic inflammatory arthropathies.

02242471	Dostinex	cabergoline	0.5 mg	Tablet
02455897	Apo-Cabergoline	cabergoline	0.5 mg	Tablet

For treatment of:

- a) Hyperprolactinemic disorders in patients unresponsive to bromocriptine.
- b) Hyperprolactinemic disorders in patients intolerant to bromocriptine.

RESPIRATORY TRACT AGENTS

02470365 02492504 02510049 02524252	Dupixent	dupilumab	150 mg/mL 200 mg/1.14 mL 150 mg/mL 200 mg/1.14 mL	Injection
--	-----------------	-----------	--	-----------

As add-on maintenance treatment for patients 6 to 11 years of age with severe asthma with a type 2/eosinophilic phenotype, if the following criteria are met:

Initiation criteria

- Patient must have a documented diagnosis of severe asthma with a type 2/eosinophilic phenotype; AND
- Symptoms not controlled despite optimal treatment, defined as daily use of medium- to high-dose inhaled corticosteroids (ICS)¹ plus one controller medication (e.g., long-acting beta-agonists (LABA)); AND
- Blood eosinophil count of ≥ 150 cells/ μ L within the past 12 months; AND
- Uncontrolled asthma with at least one clinically significant asthma exacerbation² in the past 12 months.

Administration criteria

- Dupilumab should not be used in combination with other biologics used to treat asthma.
- A baseline assessment of asthma symptom control using a validated asthma control questionnaire must be completed prior to initiation of dupilumab treatment.
- The initial prescription of dupilumab should be by a pediatric respirologist or allergist. Patients should be managed by a physician with expertise in treating asthma in pediatric patients.

¹High-dose ICS is defined as greater or equal to 400mcg of fluticasone propionate or equivalent daily. Medium-dose ICS is defined as greater than 100 mcg-400 mcg of fluticasone propionate or equivalent daily.

²Clinically significant asthma exacerbations are defined as worsening of asthma resulting in hospitalization, an emergency care visit, or treatment with systemic corticosteroids.

Renewal criteria

- The effects of treatment should be assessed every 12 months to determine whether reimbursement should continue.
- Reimbursement of treatment should be discontinued if:
 - o The 12 month asthma control questionnaire score has not improved from baseline, when baseline represents the initiation of treatment; OR
 - o The asthma control questionnaire score achieved after the first 12 months of therapy has not been maintained subsequently; OR
 - o The number of clinically significant asthma exacerbations has increased within the previous 12 months.

As add-on maintenance treatment for patients aged 12 years and older with severe asthma with a type 2/eosinophilic phenotype if the following criteria are met:

Initiation Criteria:

- Patient must have a documented diagnosis of severe asthma with a type 2/eosinophilic phenotype.
- Patient is inadequately controlled with high-dose inhaled corticosteroids, defined as greater or equal to 500 mcg of fluticasone propionate or equivalent daily, and one or more additional asthma controller(s) (e.g., long-acting beta agonists).
- Patient has one of the following:
 - o Blood eosinophil count of ≥ 300 cells/ μ L within the past 12 months AND has experienced two or more clinically significant asthma exacerbations¹ in the past 12 months, OR
 - o Blood eosinophil count of ≥ 150 cells/ μ L AND is receiving maintenance treatment with oral corticosteroids (OCS)

Administration Criteria:

- Dupilumab should not be used in combination with other biologics used to treat asthma.
- A baseline assessment of asthma symptom control using a validated asthma control questionnaire must be completed prior to initiation of dupilumab treatment.
- Patients should be managed by a physician with expertise in treating asthma.

¹ Clinically significant asthma exacerbations are defined as worsening of asthma resulting in administration of systemic corticosteroids for at least three days, or hospitalization.

Renewal Criteria:

- The effects of treatment should be assessed every 12 months to determine whether reimbursement should continue.
- Reimbursement of treatment should be discontinued if:
 - o The 12 month asthma control questionnaire score has not improved from baseline, when baseline represents the initiation of treatment; OR
 - o The asthma control questionnaire score achieved after the first 12 months of therapy has not been maintained subsequently; OR
 - o The number of clinically significant exacerbations has increased within the previous 12 months; OR
 - o In patients on maintenance treatment with OCS, there has been no decrease in the OCS dose in the first 12 months of treatment; OR
 - o In patients on maintenance treatment with OCS, the reduction in the dose of OCS achieved after the first 12 months of treatment is not maintained subsequently.

02473232 02496135	Fasenra	benralizumab	30 mg/mL	Injection
----------------------	----------------	--------------	----------	-----------

As add-on maintenance treatment for adult patients with severe eosinophilic asthma, if the following criteria are met:

Initiation Criteria

1. Patient must have a documented diagnosis of asthma.
2. Patient is inadequately controlled with high-dose inhaled corticosteroids, defined as greater or equal to 500 mcg of fluticasone propionate or equivalent daily, and one or more additional asthma controller(s) (e.g., long-acting beta agonists).
3. Patient has one of the following:
 - 3.1. blood eosinophil count of ≥ 300 cells/ μ L within the past 12 months AND has experienced two or more clinically significant asthma exacerbations in the past 12 months, or

3.2. blood eosinophil count of ≥ 150 cells/ μL AND is receiving maintenance treatment with oral corticosteroids (OCS).

Administration Criteria

1. Benralizumab should not be used in combination with other biologics used to treat asthma.
2. A baseline assessment of asthma symptom control using a validated asthma control questionnaire must be completed prior to initiation of benralizumab treatment.
3. Patients should be managed by a physician with expertise in treating asthma.

Renewal Criteria

1. The effects of treatment should be assessed every 12 months to determine whether reimbursement should continue.
2. Reimbursement of treatment should be discontinued if:
 - 2.1. the 12 month asthma control questionnaire score has not improved from baseline, when baseline represents the initiation of treatment, or
 - 2.2. the asthma control questionnaire score achieved after the first 12 months of therapy has not been maintained subsequently, or
 - 2.3. the number of clinically significant exacerbations has increased within the previous 12 months, or
 - 2.4. in patients on maintenance treatment with OCS, there has been no decrease in the OCS dose in the first 12 months of treatment, or
 - 2.5. in patients on maintenance treatment with OCS, the reduction in the dose of OCS achieved after the first 12 months of treatment is not maintained subsequently.

02492989 02492997	Nucala	mepolizumab	100mg/ml	Injection
----------------------	---------------	-------------	----------	-----------

As add-on maintenance treatment for adult patients with severe eosinophilic asthma, if the following criteria are met:

Initiation Criteria

1. Patient must have a documented diagnosis of asthma.
2. Patient is inadequately controlled with high-dose inhaled corticosteroids, defined as greater or equal to 500 mcg of fluticasone propionate or equivalent daily, and one or more additional asthma controller(s) (e.g., long-acting beta agonists).
3. Patient has one of the following:
 - 3.1. blood eosinophil count of ≥ 300 cells/ μL within the past 12 months AND has experienced two or more clinically significant asthma exacerbations in the past 12 months, or
 - 3.2. blood eosinophil count of ≥ 150 cells/ μL AND is receiving maintenance treatment with oral corticosteroids (OCS).

Administration Criteria

1. Mepolizumab should not be used in combination with other biologics used to treat asthma.
2. A baseline assessment of asthma symptom control using a validated asthma control questionnaire must be completed prior to initiation of mepolizumab treatment.
3. Patients should be managed by a physician with expertise in treating asthma.

Renewal Criteria

1. The effects of treatment should be assessed every 12 months to determine whether reimbursement should continue.
2. Reimbursement of treatment should be discontinued if:
 - 2.1. the 12 month asthma control questionnaire score has not improved from baseline, when baseline represents the initiation of treatment, or
 - 2.2. the asthma control questionnaire score achieved after the first 12 months of therapy has not been maintained subsequently, or
 - 2.3. the number of clinically significant exacerbations has increased within the previous 12 months, or
 - 2.4. in patients on maintenance treatment with OCS, there has been no decrease in the OCS dose in the first 12 months of treatment, or

2.5. in patients on maintenance treatment with OCS, the reduction in the dose of OCS achieved after the first 12 months of treatment is not maintained subsequently.

02529548	Tezspire	ezepeelumab	110mg/mL	Pre-filled Syringe
02529556	Tezspire	ezepeelumab	110mg/mL	Pre-filled Pen

As an add-on maintenance treatment for patients aged 12 years and older with severe asthma, if all the following criteria are met:

Initiation criteria:

- Asthma inadequately controlled with high-dose inhaled corticosteroids (ICS), defined as greater or equal to 500 mcg of fluticasone propionate or equivalent daily, and one or more additional asthma controller(s) (e.g., long-acting beta agonists [LABA]).
- Patient has experienced two or more clinically significant asthma exacerbations¹ in the past 12 months.

Administration criteria:

- Tezepelumab should not be used in combination with other biologics used to treat asthma.
- A baseline assessment of asthma symptom control using a validated asthma control questionnaire must be completed prior to initiation of tezepelumab treatment.
- Tezepelumab should be initiated and monitored by an allergist or respirologist with experience managing severe asthma.

¹Clinically significant asthma exacerbations are defined as worsening of asthma resulting in administration of systemic corticosteroids for at least three days, or hospitalization.

Renewal criteria:

- The effects of treatment should be assessed every 12 months to determine whether reimbursement should continue.
- Reimbursement of treatment should be discontinued if:
 - o The 12-month asthma control questionnaire score has not improved from baseline, when baseline represents the initiation of treatment; OR
 - o The asthma control questionnaire score achieved after the first 12 months of therapy has not been maintained subsequently; OR
 - o The number of clinically significant asthma exacerbations has increased within the previous 12 months; OR
 - o In patients on maintenance treatment with oral corticosteroids (OCS), there has been no decrease in the OCS dose in the first 12 months of treatment; OR
 - o In patients on maintenance treatment with OCS, the reduction in the dose of OCS achieved after the first 12 months of treatment is not maintained or improved subsequently.
